

FOR IMMEDIATE RELEASE

A resource for anyone who wants to acquire their first electric bicycle, and be very satisfied with their decisions on style, power, and usage results.

Claude Rosay's Electric Bicycle Conversion Kit Installation—Made Simple is a guidebook that shows the reader how to Design, Choose, Install and Use an e-bike kit. The reader will be taken through the entire process of building or buying an electric bicycle. Ultimately, the reader can confidently and easily make the build or buy decision.

The book begins by introducing the benefits, issues, limitations, and styles of electric bicycle use. It offers the readers multiple additional references on the topic in book form, web sites, and even an on-line community of electric bike enthusiasts. Part One offers a detailed Needs Survey that the reader is highly encouraged to complete documenting in essence the reader's needs and environment. Part Two then dissects and analyzes the Needs Survey in Part One, question by question, in detail. The end result of Part Two is that the reader is now able to make a much better decision regarding their e-bike investment, and minimize the risk of costly surprises. Part Two helps the reader adjust their expectations, and in turn leads to a greater satisfaction with their Electric Bicycle. Part Three steps the reader through the installation. Part Four is about using the e-bike.

The readers will come away from the book with an excellent introductory knowledge of Electric Bicycle Conversion Kits. The knowledge will cover how to Design, Choose, Install and Use the e-bike kit. As well as achieving a greater understanding of the e-bike issues now, and the future in the e-bike on-line communities.

About the Author – Claude Rosay, MBA

Claude Rosay's hope is to simplify, encourage, and assist the complex decision making process for the reader in regards to the acquisition and use of an electric bicycle. The author documented the decision making, options, styles, usage expectations, and results of the first electric bicycle kit he acquired, installed, and used in the Summer of 2010. As a native of West Los Angeles, cycling has always been very important to the author logging thousands of miles on the beach trails and area's roads. Of primary importance to the author is raising his three teenage children with his wife of 19 years. This is the third book Claude has published and the first one he authored solely. Info on all three books is available at www.ARPublish.com.
